Ref. 7657 G
Second-hand machine

Year of construction: 1990

Manufacturer: Windmöller & Hölscher

Mechanical equipment:

• rotary feeder with 8 rotating vacuum cylinders

• vacuum pump (type Becker, 300 m³/h), built 1998

• tube aligner with electro-pneumatic monitoring of the tube alignment, with ejector unit

• cross adjustment of the drive side

• double diagonal scoring units; needle unit for under valve perforation

• universal bottom opening stations

• bottom creasing stations for fixing the bottom width, adjustable

• CCS (convert control system) for the control of the opened bottoms, with ejector gate after the bottom turning station

• valve unit with closed glue unit (all closed glue units in the machine are for glues with a viscosity of min. 2.500 m PAS and sufficient fluidity at 1.5” pipes), for cut-off lengths 10 – 29 cm, reel width 18 – 36 cm, with
• thumbhole unit for R 15 mm,
• ejector gate,

• tube formation

• longitudinal pasting

• unwind station for max. 1.300 mm reel diameter with hydraulic lifting of the paper roll, second unwind for reel change, automatic tension control,

• edge guide unit BST for 1 ply

Operational area / Size range

Technical Equipment

essentially equipped with:
- rotary feeder with 8 rotating vacuum cylinders
- tube aligner with electro-pneumatic monitoring of the tube alignment, with ejector unit
- cross adjustment of the drive side
- universal bottom opening stations
